The proposals concerning the production of town plans contained in your letter of 28 January are acceptable to us in that they provide for coordination at the most effective point with your people and are entirely practical in facilitating production.

The priority list of Soviet towns for which you express town plan requirements is being used in our town plan production programming. We are currently developing a new priority list and will give careful consideration to your interests.

We shall proceed in our coordination with you on the basis of the procedures (a) through (e) in your letter of 28 January.

Sincerely yours,

Otto E. Guthe
